### SUMMARY

**Research Interests:** I am an astrophysicist interested in understanding galaxy evolution through the gas dynamics and metallicity content of the circumgalactic medium, its connection to the galaxy, and the escape of Lyman continuum photons through the intergalactic medium. I am also interested in galaxy quenching and how the environment (groups and clusters) plays a role in this process.

**Skills:** Expert in UV/optical spectral analysis (long-slit, echelle, slitless grism, and IFU); observing experience with Keck/HIRES and KCWI, Magellan/MIKE, HJST/GCMS, and the Green Bank Telescope; Python and IDL coding languages; proficient in Cloudy, DESI redrock, SExtractor, kcorrect, and pPXF software tools.

**Time Awarded on Telescopes:** Hobby-Eberly Telescope 38.5 hours as PI, Harlan J. Smith Telescope 14 nights as PI, Hubble Space Telescope 255 orbits as Co-I, Green Bank Telescope 571 hours as Co-I, Keck 10-m telescope 1 night as Co-I, Magellan 6.5-m telescope 1 night as Co-I, Gemini 8.1-m telescope 3.6 hours as Co-I.

**Observing Experience:** Green Bank Telescope 145.75 hours, Harlan J. Smith Telescope 14 nights, Keck Telescopes 1.5 nights, Magellan Baade Telescope 1 night, SARA Kitt Peak Telescope 1 night.

### EDUCATION

<b>University of Notre Dame</b>	Notre Dame, IN
Ph.D., Physics	January 2022
Dissertation: The Role of Dense Circumgalactic Gas in Shaping Galaxies	
M.S., Physics	January 2018
<b>Florida Institute of Technology</b>	Melbourne, FL
B.S., Physics and Astronomy & Astrophysics	May 2014
<i>summa cum laude</i>	

### PROFESSIONAL EXPERIENCE

Postdoctoral Fellow	September 2021 – Present
Department of Astronomy, University of Texas at Austin	
Advisor: John Chisholm	

### TIME GRANTED ON SPACE- AND GROUND-BASED TELESCOPES

Hobby-Eberly Telescope, UT23-3-018, 3 hours, PI	2023
Harlan J. Smith Telescope, McD23-3-013, 4 nights, PI	2023
Hobby-Eberly Telescope, UT23-2-017, 6.5 hours, PI	2023
Harlan J. Smith Telescope, McD23-2-007, 5 nights, PI	2023
Hobby-Eberly Telescope, UT23-1-008, 22 hours, PI	2023
Harlan J. Smith Telescope, McD23-1-006, 5 nights, PI	2023

Hubble Space Telescope, Cycle 30 GO-17138, 10 orbits, Co-I (PI: Mainali, Goddard)	2023
Hobby-Eberly Telescope, UT22-3-014, 7 hours, PI	2022
Hubble Space Telescope, Cycle 29 GO-16645, 24 orbits, Co-I (PI: Howk, ND)	2021
Hubble Space Telescope, Cycle 29 GO-16730, 137 orbits, Co-I (PI: Lehner, ND)	2021
Hubble Space Telescope, Cycle 29 GO-16733, 10 orbits, Co-I (PI: Rigby, STScI)	2021
Gemini 8.1-m telescope, GN-2020B-FT-103, 3.6 hours, Co-I (PI: Howk, ND)	2020
Green Bank Telescope, NRAO GBT20A-105, 20 hours, Co-I (PI: Galaz, U. Católica)	2020
Green Bank Telescope, NRAO GBT19A-326, 32 hours, Co-I (PI: Galaz, U. Católica)	2019
Keck 10-m telescope, NASA NExScI PID30/2019A_N051, 1 night, Co-I (PI: Howk, ND)	2019
Magellan 6.5-m telescope, Chilean National TAC CN2019A-23, 1 night, Co-I (PI: Tejos, U. Católica-Valparaíso)	2019
Green Bank Telescope, NRAO GBT18B-296, 175 hours, Co-I (PI: Howk, ND)	2018
Green Bank Telescope, NRAO GBT18A-291, 27 hours, Co-I (PI: Galaz, U. Católica)	2018
Green Bank Telescope, NRAO GBT18A-246, 176 hours, Co-I (PI: Lockman, NRAO)	2018
Green Bank Telescope, NRAO GBT17B-155, 57 hours, Co-I (PI: Howk, ND)	2017
Hubble Space Telescope, Cycle 25 GO-15075, 45 orbits, Co-I (PI: Howk, ND)	2017
Hubble Space Telescope, Cycle 25 GO-15313, 29 orbits, Co-I (PI: Lehner, ND)	2017
Green Bank Telescope, NRAO GBT16B-139, 72 hours, Co-I (PI: Lockman, NRAO)	2016
Green Bank Telescope, NRAO GBT16A-433, 12 hours, Co-I (PI: Lehner, ND)	2016

## GRANTS & FELLOWSHIPS

---

American Astronomical Society International Travel Grant	Fall 2023
NASA/STScI Hubble Cycle 30 GO-17138, Co-I (PI: Mainali, Goddard)	2023
NASA/STScI Hubble Cycle 29 GO-16645, Co-I (PI: Howk, ND)	2022
NASA/STScI Hubble Cycle 29 GO-16730, Co-I (PI: Lehner, ND)	2022
NASA/STScI Hubble Cycle 29 GO-16733, Co-I (PI: Rigby, STScI)	2022
Future Investigators in NASA Earth and Space Science and Technology (FINESST) NASA SMD	
• Received funding of \$90,000 for 2 years	September 2019 – August 2021
Keck Principal Investigator Data Award PID30/2019A_N051, Co-I (PI: Howk, ND)	2019
NASA/STScI Hubble Cycle 25 GO-15075, Co-I (PI: Howk, ND)	2018
NASA/STScI Hubble Cycle 25 GO-15313, Co-I (PI: Lehner, ND)	2018
Graduate School Notebaert Professional Development Fund	Spring 2017
Graduate Student Union Conference Presentation Grant	Spring 2017

## RESEARCH EXPERIENCE

---

### University of Texas at Austin

Postdoctoral Fellow, Astronomy

September 2021 – Present

Advisor: John Chisholm

- Reduced HST/WFC3 UVIS G280 slitless grism observations of the Sunburst Arc to analyze and compare the ionizing stellar continuum with models. Calculated absolute and relative escape fractions of the galaxy. Characterized foreground IGM absorbers along the line of sight.
- Created a pilot program using a novel technique to study the intragroup medium by observing proximate absorbers around QSOs.
- Observed QSO fields with strong HI absorbers along the line of sight with the large IFU GCMS on the Harlan J. Smith Telescope to identify and characterize the host galaxies.
- Observed the 21cm hydrogen line with the Green Bank Telescope for a subset of the CLASSY galaxies for HI mass determinations.
- Observed the 21cm hydrogen line with the Green Bank Telescope for a sample of low-mass, low-metallicity dwarf galaxies for HI mass determinations.

### University of Notre Dame

Graduate Research Assistant, Physics

August 2016 – January 2022

Advisors: Chris Howk and Nicolas Lehner, Doctoral Thesis

- Determined the HI covering factor in the circumgalactic medium (CGM) for a sample of 21 luminous red galaxies (LRGs) using QSO absorption line spectroscopy. Estimated the metallicity of the detected Lyman limit systems.
- Identified and characterized the host galaxies associated with a sample of 19 Lyman limit systems with measured metallicities using IFU observations. Explored the connections between the CGM and host galaxy properties.
- Determined the metallicity distribution function in the inner CGM of a sample of 55 LRGs using QSO absorption line spectroscopy.

NSF-REU, Physics

May – August 2013

Advisor: Justin Crepp

- Drafted the first mechanical design of the “iLocator” spectrograph that will be used with the Large Binocular Telescope to search for exoplanets in the Y-band of the infrared spectrum using the 3D CAD software *SolidWorks*.

### Florida Institute of Technology

Undergraduate Research Assistant, Physics and Space Sciences

January 2013 – May 2014

Advisor: Daniel Batcheldor

- Analyzed doubly ionized oxygen [OIII] emission from active galactic nuclei (AGN) to determine constraints for outflow rates in galaxy models using IRAF and Graphical Astronomy and Image Analysis software to reduce the spectra.

Southeastern Association for Research in Astronomy NSF-REU

May – August 2012

Advisor: Daniel Batcheldor

- Measured and analyzed AGN light curves to determine how their brightness changes on small timescales using IRAF.

“Merger Interactions Enhance Star Formation Rates in Galaxy Group Housing QSO PKS0405–123 and Gaseous Nebulae,” Wolter, I.E., **Berg, M.A.**, Chisholm, J., *Research Notes of the American Astronomical Society*, 7, 232 (2023)

## INVITED PRESENTATIONS

---

“The Role of Dense Circumgalactic Gas in Shaping Galaxies,” CGM@ND Workshop II, Kilemore, Ireland, September 3-15, 2023

- Member of the local organizing committee
- Session Chair

“First Observations of the Stellar Continuum from 600-900Å with the Sunburst Arc,” UV Galaxies 2023, Reykjavik, Iceland, July 3-7, 2023

- Session Chair

“Is Empty Space Really That Empty?,” McDonald Observatory Star Party, McDonald Observatory Visitor Center, March 28, 2023

“Bimodal Absorption System Imaging Campaign: IFU Survey Results,” 2022 Arthur M. Wolfe Symposium in Astrophysics, University of California, Santa Cruz, March 21-25, 2022

“Revealing the Stellar Continuum Below the LyC Limit with the Sunburst Arc,” 2022 Galaxy Evolution Workshop, University of Texas at Austin, January 13, 2022

- Workshop Discussion Section Lead

“The Bimodal Absorption System Imaging Campaign: Origin of the Metal-poor Gas at  $z < 1$ ,” Astrophysics Brown Bag Lunch Talk, Massachusetts Institute of Technology, March 29, 2021

“The Role of Dense Circumgalactic Gas in Shaping Galaxies,” CGI Seminar, University of California, Santa Cruz, November 9, 2020

## PRESENTATIONS

---

“The Bimodal Absorption System Imaging Campaign (BASIC): A Dual Population of Low-metallicity Absorbers at  $z < 1$ ,” What Matter(s) Around Galaxies 2022, Champuloc, Italy, September 12-16, 2022

“The Role of Dense Circumgalactic Gas in Shaping Galaxies,” Galaxies and Cosmology Seminar, University of Texas at Austin, September 20, 2021

“The Circumgalactic Medium and its Effect on Galaxy Evolution,” 237<sup>th</sup> meeting of the American Astronomical Society, January 11-15, 2021

“Galaxies with Accretion Signatures at  $z < 1$ ,” Astrophysics Seminar, University of Notre Dame, October 27, 2020

“The Galaxies Associated With the Bimodal Metallicity Distribution,” 235<sup>th</sup> meeting of the American Astronomical Society, Honolulu, HI, January 4-8, 2020

“New Results from the RDR and BASIC Programs,” What Matter(s) Between Galaxies conference, Abbazia di Spinetto, Italy, June 3-7, 2019

“The Red Dead Redemption Survey: Cool Gas in the Halos of Massive Galaxies,” Astrophysics Seminar, University of Notre Dame, March 19, 2019

“Unexpected Detection of a Cool Gas Reservoir in the Hot Halos of LRGs,” Intergalactic Interconnections conference, Aix Marseille Université, France, July 9-13, 2018

“Green Bank Telescope Observations of HI in the Circumgalactic Medium of M31,” Denny, L., Early, L., **Berg, M.**, Howk, C., Lehner, N., Lockman, F., Wotta, C., *American Astronomical Society, meeting #231*. Poster abstract (2018)

“A First Look at the Origin of the Bimodal Metallicity Distribution of the Dense  $z < 1$  CGM Gas with HST/ACS and VLT/MUSE Observations,” What Matter(s) Around Galaxies conference, Durham University, UK, June 19-23, 2017

“VLT/MUSE and HST/ACS Observations of  $z < 1$  Galaxies: Origin of the Bimodal Metallicity Distribution of the Lyman Limit Systems,” Space Telescope Science Institute 2017 Spring Symposium, poster presentation

“iLocator: A Diffraction-Limited Doppler Spectrometer for the Large Binocular Telescope,” Crepp, J.R., Bechter, A., Bechter, E., **Berg, M.**, Carroll, J., Collins, K., Corpuz, T., Ketterer, R., Kielb, E., Stoddard, R., Eisner, J.A., Gaudi, B.S., Hinz, P., Kratter, K.M., Macela, G., Quirrenbach, A., Skrutskie, M.F., Sozzetti, A., Woodward, C.E., Zhao, B., *American Astronomical Society, meeting #223*. Poster abstract (2014)

“Reverberation Mapping of AGN Dusty Tori in the Infrared,” Twadelle, K., **Berg, M.**, & Batcheldor, D., *American Astronomical Society, meeting #221*. Poster abstract (2013)

## TEACHING EXPERIENCE

---

### University of Texas at Austin

Astronomy Graduate Student Observing Program

Spring 2023

- Co-wrote a proposal for an observing workshop and McDonald Observatory trip for astronomy graduate students to fill in their knowledge gap with seminars on observing, instrumentation, data reduction, and proposal writing.
- Co-organized an observing trip to McDonald Observatory where 11 students completed 4 observing projects (one at each telescope) to gain skills in observing with ground-based telescopes.
- Lead of McDonald Observatory trip for logistics and observer trainings.
- Co-created the student observing projects focused on the McDonald instrumentation.
- Co-trained the students on how to observe with the McDonald telescopes.
- Co-created surveys to assess the student growth and enthusiasm for observing.
- Co-presented the program and outcomes to the Astronomy department with recommendations to continue the program and/or integrate it into a graduate observing course.

Substitute Lecturer

- Introduction to Astronomy: Fall 2022  
Delivered two 50-minute lectures to (~70) non-science undergraduates students (ranging from freshman to seniors) on dark matter, dark energy, the fate of the universe and life in the universe.

## **University of Notre Dame**

Teaching Assistant, Physics

August 2014 – May 2016

- Physics I and II for Engineers Tutorials: Fall 2014, Spring 2015, 2016  
Guided ~25 students through 1-3 problems in a group setting to reinforce topics from the lectures for a 50-minute class period, graded their work, and graded exams.
- Observatory: Fall 2014, Spring 2015, 2016  
Set up 8" telescopes, helped students in Descriptive Astronomy (~60) and Elementary Cosmology (~100) complete projects, and graded exams.
- Descriptive Astronomy: Spring 2015  
Guided (~60) non-science undergraduate students through a spectroscopy lecture and hands-on lab identifying ground-state emission lines of hydrogen, helium, and sodium using light boxes, gas tubes, and hand-held diffraction gratings.
- Modern Observational Techniques: Fall 2015  
Attended lectures, created homework solutions, and facilitated the observatory project using the 0.8m telescope for ~15 students.

Physics Practicum

Fall 2019

- Delivered 3 lectures for the 75-minute class Physics of Astrophysics to ~10 students with an observer. Received peer-evaluations from professors and reflected on teaching and lecture goals. Topics covered: ionization equilibrium, thermal equilibrium, and emission line diagnostics.

## **OBSERVING EXPERIENCE**
